

**This will only work on a windows desktop/pc (you can try on apple though)**

## Setup

- 1.) I sent a zipped folder called Final VR Scene
- 2.) Download the zipped folder
- 3.) Extract the file by double clicking on it (in windows right click on the zipped file and click on extract all)
- 4.) Now wait until you connect it to a headset
- 5.) Once connected to a headset you can do step 6
- 6.) Ok now in the folder there should be a file titled CortezIsabella\_VRScene
  - a.) Double click on that file to run it
  - b.) Hit escape to end it

## Connect PC to VR Headset

- 1.) Download the meta quest application to your PC from this link:  
[https://www.meta.com/quest/setup/?srsltid=AfmBOopXZIkQXtV7f6I\\_z5f22I\\_DSFFjwt8WDMBjKrQhEF0\\_uMpgEglT](https://www.meta.com/quest/setup/?srsltid=AfmBOopXZIkQXtV7f6I_z5f22I_DSFFjwt8WDMBjKrQhEF0_uMpgEglT)
- 2.) Once it is downloaded, double click on the oculus set up application and follow through the installation process

- 3.) Once it is installed, find the location you installed the app in (or find it on desktop shortcuts) open up the Meta quest app by double clicking on it

- 4.) Create or log into meta headset account
- 5.) Once logged in, select the headset version that you have
- 6.) Then decide how you want to connect your headset
- 7.) Put on your headset
  - a.) Open up quick settings and link or air link to your pc and click launch
    - i.) Follow this YouTube Video for Instructions:  
[https://www.youtube.com/watch?v=kz33-7z\\_fM4](https://www.youtube.com/watch?v=kz33-7z_fM4)
- 8.) Once the headset is on, and launch is clicked, the screen should look like timecode 3:06 in the video (that is how you know you did it correctly)
- 9.) Once it looks like that, then you are connected to the pc
- 10.) Now you can follow step 6 from above:
- 11.) In the final VR scene folder there should be an application titled Corteziabella\_VRScene
  - a.) Double click on that file to run it
  - b.) Hit escape to end it
